PROFESSIONAL SUMMARY

Information Technology student and full-stack developer with hands-on experience in React.js, React Native, Node.js, Python, and machine learning. Proven ability to design RESTful APIs, build responsive web/mobile interfaces, and implement secure database architectures through internships and end-to-end projects. Skilled in modular architecture, Git version control, continuous learning, and collaborative problem-solving.

TECHNICAL & SOFT SKILLS

- **Languages & Core:** Python, JavaScript, Java, C, HTML/CSS
- **Frameworks & Libraries:** React.js, React Native, Node.js, Express, Flask, scikit-learn, Pandas
- **Databases & Cloud:** MongoDB, Firebase (FCM), REST APIs, JWT, Google Gemini API
- **Developer Tools:** Git, GitHub, Version Control
- **Soft Skills:** Problem-Solving, Team Collaboration, Analytical Thinking, Adaptability, Technical Communication

WORK EXPERIENCE

Full-Stack Development Intern | Novitech R&D Private Limited, Coimbatore (June 2026 – July 2026)

- Developed responsive web applications using React.js, Node.js, and MongoDB, ensuring cross-browser compatibility and mobile-first responsiveness.
- Designed and implemented RESTful API endpoints; integrated backend logic with MongoDB schema designs to support scalable data operations.
- Collaborated with cross-functional team members using Git, maintaining modular codebases and adhering to industry-standard software engineering practices.

PROJECTS

Loan Utilization Tracking Mobile App | React Native, Node.js, Express, MongoDB, Google Gemini API

- Architected a full-stack financial application consolidating multi-lender loans into unified web and mobile dashboards.
- Formulated a custom algorithm calculating real-time Loan Utilization Health Scores (0–100) based on repayment consistency data.
- Integrated Google Gemini 1.5 Flash API for personalized financial recommendations and Firebase FCM for automated EMI push notifications.
- Implemented secure authentication using JWT and bcrypt encryption to protect user credentials and session data.

PhishShield-AI | Python, Flask, scikit-learn, Pandas

- Engineered an AI-driven cybersecurity web application for real-time phishing URL detection using supervised machine learning classification.
- Extracted structural and domain features from raw URLs to train and validate scikit-learn models for risk scoring.
- Built a lightweight Flask RESTful backend connected to a responsive frontend for instant link analysis and user feedback.

EDUCATION

B.Tech in Information Technology | VSB College of Engineering Technical Campus, Coimbatore

Expected Graduation: 2028 | **CGPA: 8.77 / 10**

CERTIFICATIONS & LANGUAGES

- **Certifications:** Infosys Springboard (Python, C) | Simplilearn (Cybersecurity Fundamentals)
- **Languages:** English (Professional), Tamil (Native)
